At GSLIS, we prepare students to become leaders in the information professions, working at the forefront of innovation in areas as diverse as business, education, health care, and science to develop solutions to society’s most pressing challenges.

Consistently named the top library and information science school in the nation, we offer graduate degrees with areas of specialization including digital libraries, data curation, K-12 school librarianship, social and community informatics, socio-technical data analytics, and youth services as well as continuing professional development opportunities. Courses are available both on campus and online.

Our graduates have job titles like...

- Competitive Intelligence Analyst
- Corporate/Science Librarian
- Data Analyst
- Emerging Technologies Librarian
- Information Architect
