I. Knowledge Organization and LIS: Philosophical and Historical Perspectives

   - Chapter 1: The Aristotelian origins (pp. 15–37).
   - Chapter 2: Taxonomy (pp. 38–64).
   - Chapter 3: Nomenclature (pp. 65–84).

   - Chapter 1: The bibliographical universe (pp. 6–19).
   - Chapter 4: Bibliographical instruments and their specifications (pp. 55–68).
   - Chapter 5: Subjects and the sense of position (pp. 69–92).
   - Chapter 6: Indexing, coupling, hunting (pp. 93–113).

II. Classification and Categorization: Theoretical Foundations

   - Chapter 3: Cognition and categories (pp. 40–59)
   - Chapter 5: Structural models of classification (pp. 88–96)
   - Chapter 6: Non-faceted classification (pp. 97–104)
   - Chapter 7: Faceted structures (pp. 105–126)

   - Chapter 1: The purpose and effects of classification (pp. 1–21)
   - Chapter 2: The making of the schedule: I. Terms. Principles of division (pp. 21–34)
   - Chapter 3: The making of the schedule: II. Artificial and natural classification (pp. 34–41)
   - Chapter 4: The making of the schedule: III. The parts of a book classification (pp. 41–52)
   - Chapter 5: Notation (pp. 53–68)

III. Indexing and subject analysis

   - Chapter 2: Subjects as subjects alone (pp. 24–44).
   - Chapter 3: Subjects in relation to works (pp. 45–71)
   - Chapter 4: Subjects and the public (pp. 72–86).

IV. Language, semantics, and vocabularies in KO

   - Chapter 2: The nature of documentary languages (pp. 3–11)
   - Chapter 3: Formal aspects (pp. 12–29)
   - Chapter 4: Semantic aspects I: the paradigmatic axis (pp. 29–54)
   - Chapter 5: Semantic aspects II: the syntagmatic axis (pp. 55–88)
   - Chapter 7: The indexing processes (pp. 107–116)

   - Chapter 1: Introduction (pp. 1–8).
   - Chapter 2: Knowledge representation and inference (pp. 9–39).

IV. Knowledge Representation and Ontologies

- Chapter 2: Bibliographical objectives (pp. 15–30).
- Chapter 3: Bibliographical entities (pp. 31–52).
- Chapter 4: Bibliographical languages (pp. 53–66).
- Chapter 8: Subject languages: Introduction, vocabulary selection, and classification (pp. 127–146).
- Chapter 9: Subject languages: Referential and relational semantics (pp. 147–171).
